

## Modified invoicing for applications for national scientific-technical advice

date: 07/10/2021

**From 1 October 2021, the FAMHP uses a new invoicing method for applications for national scientific-technical advice of types I, II and III that are treated by the National Innovation Office and Scientific-Technical Advice Unit.**

Applicants no longer pay a fee when submitting the application for advice, but must pay the invoice issued by the Budget and Management Control Division.

It is important to mention the structured reference on the invoice when making the payment. Without the structured reference, we will consider the invoice as unpaid.

Further clarifications on [the procedure](#) and on [the fees](#).
